

HST-4650 Plastic ash content tester

Picture is for reference only

Application:

Ash Content Tester is used to determine the ash content of rubber product, plastic and other products (PE, PP, PB and other plastic resin and also compounds) by burning the organic matter and heating the residue at high temperature until constant mass is reached.

Specifications:

Model	HST-4650
Furnace dimension	100×100×100mm
Working temperature	≤1050℃
Max. temperature	1100℃
Resistance measuring range	1×105Ω—1×1012Ω
Accuracy of constant temperature	±1℃
Temperature control mode	30 phase programmable control
Power supply	220V, 50Hz
Dimensions	200×230×360mm
Weight	10kg
