

Compression Platen For Universal, Dynamic, and Fatigue Testing Machines

Full Product Info

Item	Content
Item No.	32
Product Name	Compression Test Fixture (Compression Grip)
Model	HK-29
Max Test Load	20kN
Application	Used for compressive property testing of metal and non-metallic materials, including plastics, rubber, alloys, composite materials, etc.
Applicable Test Standards	ISO 604, ASTM D695, GB/T 1041, GB/T 7757
Core Technical Parameters	Compression platen diameter: 120mm Platen thickness: 20mm Surface treatment: Non-hardened flat steel surface
