

HST-QTJ200 Film Strip Cutting Machine

Picture Just for Reference

Application:

HST-QTJ200 Film Strip Cutting Machine is a special equipment for preparing samples for film tensile testing. It can cut PET polyester film with a thickness of less than 0.5mm or other materials that can be cut with a blade.

The machine adopts spring latch mechanical control and is equipped with a special blade. It can quickly complete the preparation of tensile specimens, greatly improve the efficiency of tensile testing, avoid the errors caused by traditional manual cutting methods, effectively reduce the errors of test results, and ensure product quality performance. It is one of the necessary equipment for various film tensile tests.

Technical parameters:

Model	HST-QTJ200
Sample specifications	200*15mm (Can be customized as required)

Number of samples prepared at one time	10
Sample width	15±0.1mm (Can be customized as required)
Number of blades	11
Blade material	German Lutz high-strength die steel blade
Operation height	900mm (recommended)
Material	High-strength hard aluminum anodized, stainless steel
Product size	About 360*250*225mm
Weight	About 15kg
Product packaging	Randomly equipped with high-grade foam padding box
